This was a relatively high-scoring paper, with a small number of candidates gaining full marks. A few questions (25 and 31 for example) were found to be particularly straightforward and this will have contributed

BIOLOGY - papers.gceguide.com
Domain architecture – the arrangement of features in a protein – exhibits syntactic patterns similar to the grammar of a language. This feature enables pattern mining for protein function prediction, comparative genomics, and studies of molecular evolution and complexity. To facilitate such work, here we propose Regular Architecture (RegArch), an expression language to describe syntactic ...
