refrigerant – leaks of up to 30% of the charge during a year are not uncommon. Leak rates do not have to be this high. Adherence to best practice in service, maintenance leak testing and repair can significantly reduce refrigerant losses. This guide shows you how. In this guide, key points are highlighted and include this symbol:

Guide to Good Leak Testing - US EPA
Tools Needed: An air conditioning manifold gauge set; A supply of R-134a refrigerant if needed for recharging (available locally) Open ended wrench set; An air conditioning manifold gauge set is a must-have tool for anyone who is interested in performing some basic system work at home, such as checking pressure in a/c lines, determining if there's a leak, adding small amounts of refrigerant ...

How To Use An A/C Manifold Gauge Set
The normal reading on both the high side and the low side should be 80 to 105 PSI. Turn the A/C system on to "max/high" output. With the engine speed at about 1,000 RPMs, check the low side PSI reading, which should be about 25 to 35 PSI, then check the high side PSI reading, which should be about 200 to 350 PSI.
