### Radiant Floor Heating 101 - Bob Vila

Is the heating plant properly sized, are there enough tubing in the floor to carry the btu load, etc. Back in the day when we began doing radiant (late 1980's) the first thing we did when we went out to a job because a homeowner called to say the boiler would never stop running was to look and see if there was a snow line approx 2 feet out away ...

### No under slab insulation — Heating Help: The Wall

1. Energy Efficient Heating. There are two types of radiant floor heating, electric and water-based systems. Both provide heating in a room from the floor up for consistent, efficient warmth. Warm water systems run hot water through pipes to create heat, whereas electric underfloor heating heats wiring beneath the floor to generate heat.

### Radiant Floor Heating, Second Edition eBook by R. Woodson ...

For example, it's common for hydronic radiant heating to be used on the first floor of a house while the second floor rooms are heated using panel radiators or fin-tube baseboard. Commercial and industrial buildings often require heat emitters that are more resistant to physical damage in comparison to those used in residential buildings.

### Hydronic Heating - Appropriate Designs

Radiant floor heating produces room temperatures at 75°F at floor level, declining to 68 °F at eye level, and then to 61°F at the ceiling. According to the Radiant Panel Association, a radiant heat floor normally feels “neutral” with a surface temperature lower than normal body temperature, although the overall sensation is one of comfort.

### Heating and Cooling - Green Builder Media

I had a Munchkin boiler installed last year with 3 zone valves. Only one zone was initially hooked up to slant fin baseboards on my main floor. This was plumbed with 3/4-inch wirsbo pex. The other 2 zones were for a future finished basement and a future 2nd floor addition. The 2nd floor has been framed and I'm ready to add the zone.
